Education

New England Institute of Technology 2017-2021

Associate in Science in Digital Media Production, June 2019

Bachelor of Science in Digital Media Production, March 2021

Experience

Seven Hills video: I produced a short team building video for seven hills. Most of this project was editing since the client already had the media they wanted in this video and had to also work closely with them to get her requests as closely as I could.

The Rhode Island 48 Hour Film Festival: I worked with a team to help film, produce and fully edit a 6–7-minute film in the span of 48 hours. The project had many tight deadlines back-to-back in order to get the whole project in within the time period. My time and effort had to be 100% dedicated to this project.

Independent School Projects

- **Documentary:** I Planned, Filmed, and edited a short 6-minute documentary about a person's experience in RI parks before and during Covid-19.

- **Advertisement:** I imagined a product to produce and direct a full advertisement campaign which included a billboard, a web banner, a two 30 second radio ads, a 10 second TV ad, a 15 second TV ad and a 30 second TV ad.

- **Short Film:** I made a video for a client being 15 minutes long and was visioned from the client. I had to make the full shot list, perform all the camera work, schedule filming times and lead the actors during group shoots as well as all of the postproduction work including mostly Premiere Pro work with some After Effects work mixed in.

Photography: I have been a photographer in my free time capturing just about anything. I have been doing this for about 3 years now and have my best examples up on my website.

Work History

July 2019 – March 2020

Registrars' assistant at New England Institute of Technology, Warwick, RI
Assisting the Registrar with office duties such as organization and answering the phone.
